Quality with History in Laboratory Technology

www.pd-gruppe.de

Introduction to catalogue and price list systematics

In our catalogue you find a - at first glance maybe confusing variety - of products. Its sense is, that the customer can be offered a device ideal for his/her application with regard to the cost/performance ratio. For advising the customer it is essential for all products to find out about the application of the device.

Thermostats E5/E5s/C5/C20 (catalogue pages 3-6)

First of all you find the thermostats of series E and C in our catalogue. These thermostats basically differ in the electronic equipment, the pump capacity and the temperature stability.

All thermostats can be employed for temperating tasks with already existing vessels or with our bath vessels (page 6). Further on all cryostats offered, are, depending on the task, equipped with one of the thermostats offered. The K10 can be equipped with thermostats of the E series only.

The circulation coolers do not have any thermostat, since a cooling capability has to be effected.

Water baths with Timer (catalogue page 9)

The water baths are always delivered with an inclined cover according to the specification shown.

If the customer e. g. wants to heat the content of Erlenmeyer flasks, the use of an additional flat cover (picture top right) would be expedient. You can find it on page 11 under accessories for water baths. Subject to the application we offer 6 flat covers. If the customer wants to close the interspace between flask neck and cover, he/she can use the corresponding water bath rings.

Shaking water bath SWB 20 (catalogue page 10)

In series the SWB 20 is equipped with a shaking basket SKF 20. In order to adjust the shaking material (e.g. flask) on the bottom of the shaking basket, we offer the so-called holding clamps in different versions (page 11). The varied possibilities of adjustment you see on page 10. For shaking test tube racks or other shaking material the shaking basket SKR 20 is available as accessory.

Cryostats -10 till -75 °C (catalogue pages 14 till 19)

In combination with the cryostats we offer a variety of cooling device/thermostat combinations in order to provide the customer with a device ideal for his/her application with regard to the cost/performance ratio. Especially with the cooling devices it is very important to know, what the customer wants the device for.

Due to the variety of possible combinations we have included a selection of possible combinations of cooling devices with thermostats in our product catalogue only. Therewith it is shown, that principally all cooling devices (exception K10 a.m.) can be combined with all thermostats of the E and C series. All single variations are to be found in the price list. There you also find the accordant differences for bath volume, temperature range, cooling and pump capacity.

For example: Cryostat KB55 C20 **K** it is not in the catalogue. The ‚K‘ means ‚cooling control of the thermostat‘, i.e. if a heat emission is effected by the thermostat, it independently regulates the cooling device analogically

Please do not hesitate to contact us for advice in particular cases. It is important to you, to gather us much information on the application of the device from the customer as possible. This is also essential e. g. in order to select the right hoses (material and length).

Circulation cooler (catalogue page 20)

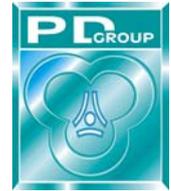

Except for the KK5 TBE the price list complies with the product catalogue. We have deleted the KK5 TBE from our range of products.

It is the same for all products: If the customer needs a special design for a particular application, it can be realized by us. We are at your disposal for your requests.

Bath-/ Immersion Thermostat E 5 / E 5s

The previous existing bath-/ immersion thermostat E 1 is replaced by the new thermostats E 5/E5s with Timer. It can be used in the same way like the previous thermostat E 1. So it can be ordered as single device with a clip or in combination with a polycarbonate- or a high-grade steel bath. The E 5s has a higher heating power and an enhanced temperature-range.

E 5

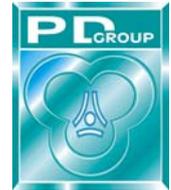

E 5s

Specifications

	E 5	E 5s
Working temp. range:	25...100 °C	25...150 °C
... with external cooling	-30...100 °C	-50...+150 °C
Temperature stability:	± 0,05 K	± 0,05 K

Bath-/ Immersion Thermostat E 20

The previous existing bath-/ immersion thermostat E 10 is replaced by the new thermostat E 20. It can be used in the same way like the previous thermostat E 10. It can be ordered as single device with a clip or in combination with a polycarbonate- or high-grade steel bath. Thermostat E 20 K is supplied with a cryo- (cool) control to save energy.

E 20

Specifications

Working temperature range:	E 20 Approx. 30...200 °C (short-time to 250 °C)
Temperature range with. ext. cooling:	-60...200 °C (short-time to 250 °C)
Temperature controller:	adaptive PID-Control for different thermostat liquids
Temperature stability DIN 12876-2:	± 0,01 K (at 70°C in water)

Bath-/ Circulation Thermostat C 20

The previous existing bath thermostat C10 is replaced by the new thermostat C 20.

The device can be used in the same way like the previous thermostat C10. Consequently, the thermostat can be used as device with tripod or bath-bridge, but also in combination with our steel-baths. Baths in use can be retrofitted on C20 without problems. The standard device is supplied with a double-throw pump control.

For use together with a cooling device, the thermostat C 20 K is supplied with a cryo-(cool) control to save energy.

Temperature Controller:

Micro-processor-controlled PID-regulator, three fixed temperatures adjustable, adjustable lower and upper set point limit, adjustable button locking, limiting value of alarm visual and/or acoustic, alarm function can be switched off, alarm of temperature sensor can not be switched off, temperature setting in Celsius or Fahrenheit:

Timer:

Three fixed times adjustable, timer adjustable within 0 - 99,99 minutes

Safety Function:

'dry-going-protection' integrated in the heater

Outlet:

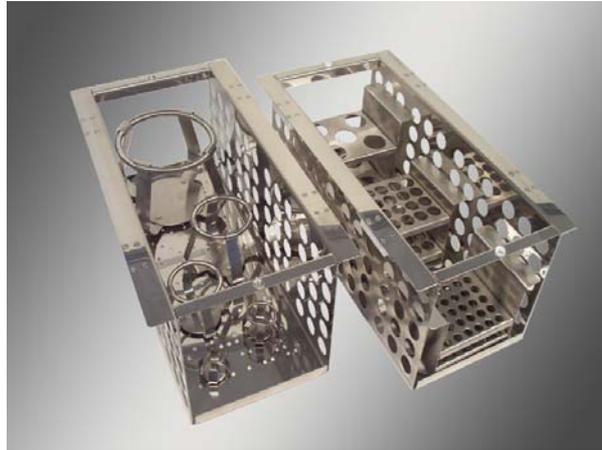

With seal screw / drain cock possible

Table Cryostat -10 °C

K10 E5

Specifications		K10 E 5	K10 E 20
Temperature range	°C	-10...+100	-10...+100
Temperature stability	K	± 0,1	± 0,01
Bath volume	l	3	3
Bath depth	mm	130	130
Bath opening	mm	135 x 105	135 x 105
Pump flow rate max.	l/min	5	8
Pump pressure max.	bar	0,12	0,2
Programs		--	2 applets with 10 time-/temp. segments each
Temperature display		LED	digital, graphic display
resolution	K	0,1	0,1
Temperature setting		digital	digital, Touch Panel
resolution		0,1	0,1
Safety class DIN 12876		3	3
Interface		--	RS 232
External sensor connection		--	Pt 100
Heat Power	KW	1,0	1,8
Cooling power at 0 °C	W	130	130
Power supply	V/Hz	230/50	230/50
Dimensions (wxdxh)	mm	205x335x540	205x335x540
Weight	kg	ca. 17,5	ca. 17,5
